

How to Download Changes to the Project

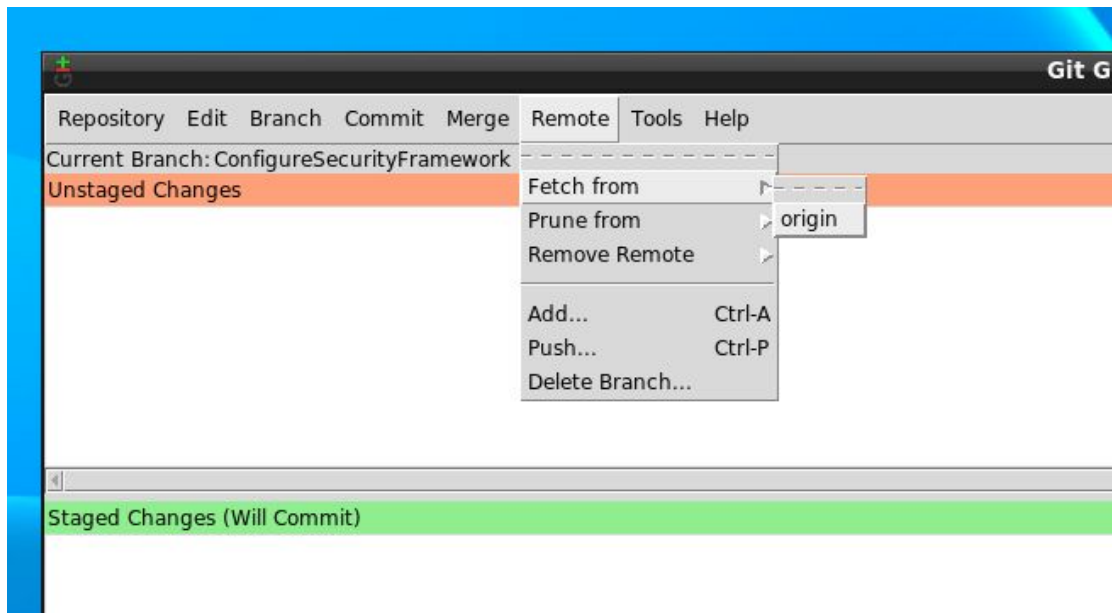

1. Open the Git GUI from the desktop shortcut.

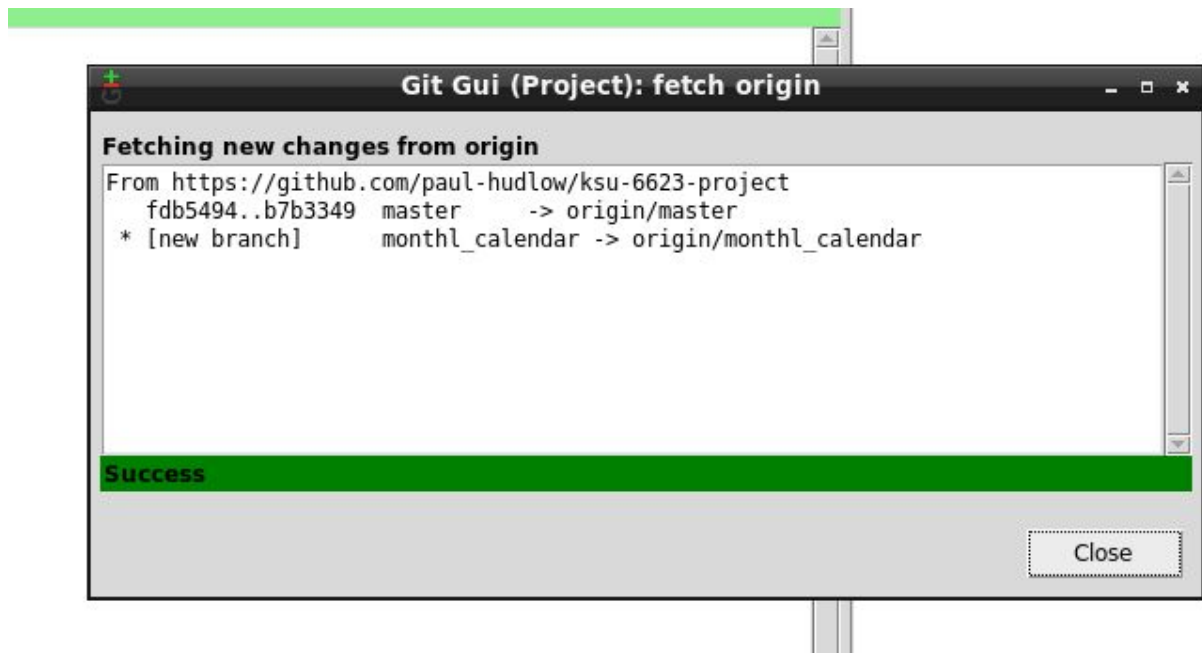

2. Select the recently user workspace in ~/Project.

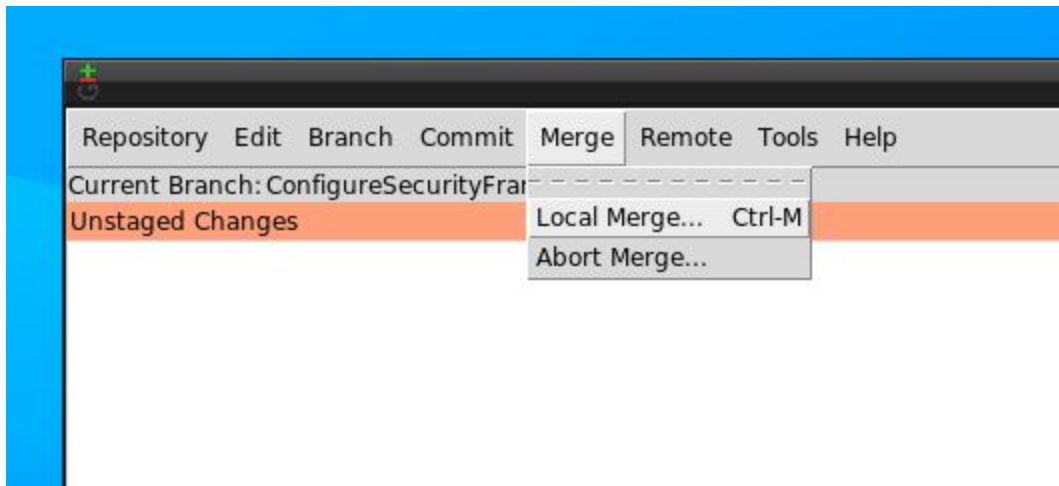

3. From the menu select Remote -> Fetch from -> origin

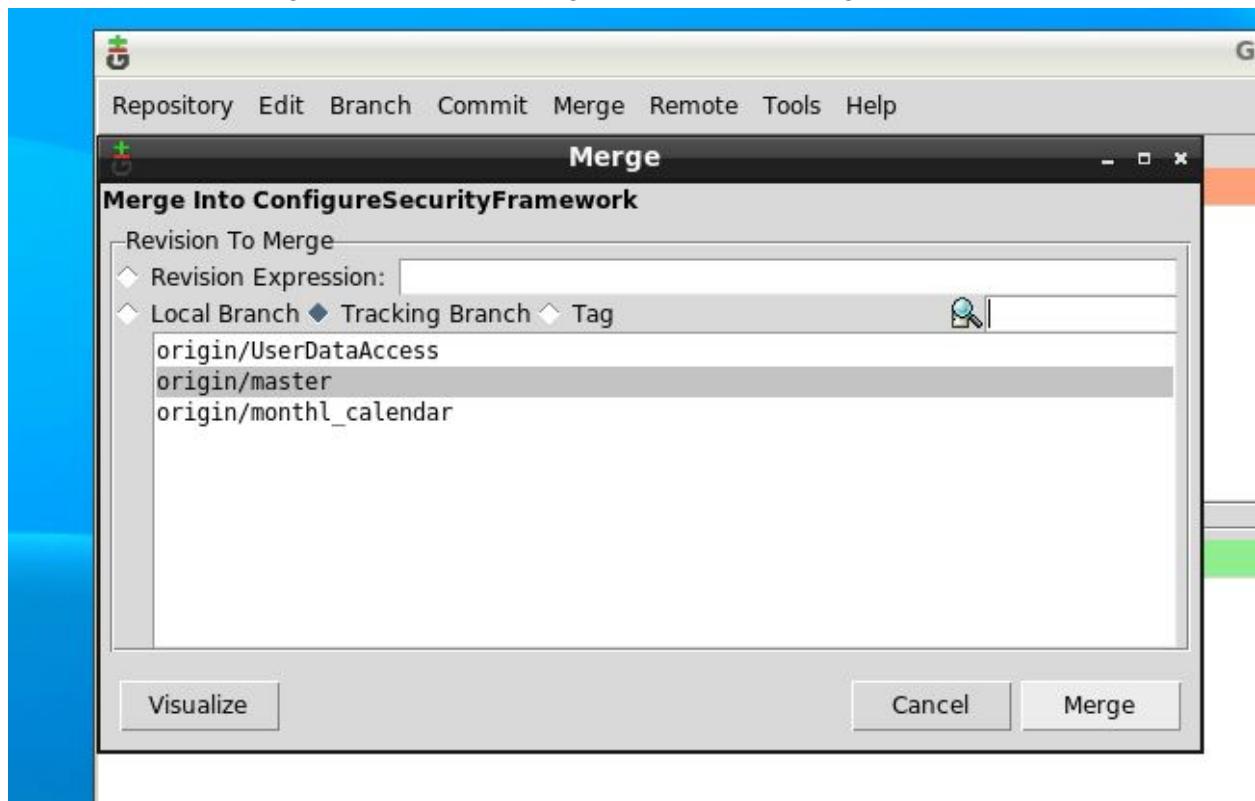

4. Enter GitHub credentials.

5. From the menu select Merge -> Local Merge...

6. Select Tracking Branch and then origin/master. Click Merge.

7. If there are no conflicts, your workspace should be up to date!
